

# Automatic Tractor Steering Agritech

NARAS

WITH THE SATELLITE-ASSISTED HIGH-TECH AUTOMATIC STEERING SYSTEM, TRACTOR AND HARVESTER STEERING CAN BE AUTOMATICALLY CONTROLLED WITH 2.5 CM SENSITIVITY DURING TILLAGE, PLANTING AND HARVESTING. THE TRACTOR RUDDER IS AUTOMATICALLY STEERED BY THE SYSTEM WITH RESPECT TO THE IMPLEMENT WIDTH AND PLOUGH PATTERN ENTERED ON THE USER SCREEN, PROVIDING HIGH WORK QUALITY AS WELL AS REDUCING COSTS IN FUEL, INPUT AND LABOR.

The system, on the field, automatically steers the wheel on row and headland turns and provides quick entry to the row. It allows the system to be used at night. With the use of the smart sensors on the system, it delivers high precision results even on the rough terrains. Using the correction signal received from the system, TUSAGA-Active, it provides hands-free parallel steering in the field.

## CENTER OFFICE

Kazım Dirik Mah. 296/2. No:33 Bornova,  
İzmir/Türkiye
