

Smart Weed Hunter Agritech

NARAS

WITH THE HELP OF HIGH-TECH SENSORS, THE SMART WEED HUNTER ALLOWS YOU TO DETECT WEEDS IN THE FIELD BY USING IMAGE PROCESSING TECHNIQUE AND SPRAY THE CHEMICAL ONLY ON THE WEED. YOU CAN ALSO MONITOR THE DETAILED DATA READ THROUGH THE SYSTEM VIA THE TOUCH USER SCREEN IN REAL TIME, TRACK THE SPRAYED AREAS WITH MAPPING AND EASILY CONTROL THE SPRAYER.

The Smart Weed Hunter scans the field in real time and detects weeds with the help of the image processing units integrated on the system. Spraying is merely applied to areas with weeds on the field which helps to save significant amounts of pesticide. With the use of GPS receiver, the system maps the weed zones and stores this data for future use. Thanks to the sensors on the system, critical information such as pressure and tank level can be monitored in real time via the user screen.
